PROJECTS

ALGO SORT

Project Link: <https://jocular-melomakarona-e2ea23.netlify.app/>

In this website we can visualize how famous sorting algorithms such as bubble sort, selection sort, insertion sort, merge sort, quick sort and heap sort works.

- This website is built using HTML, CSS and JavaScript and hosted using Netlify.
- Features of Algo-Sort
 - Color representation of step being executed like red color of bars denote incorrect position of element, green denotes correct position, yellow denotes compared bars and blue is the default color.
 - Speed of visualization (5 levels), Data size (used to increase or decrease the data set size), Random data generator (generates random array for sorting) are the three controls of visualization.
 - Time and Space Complexity of every running algorithm is also provided while sorting.

AR MUSIC PLAYER

Project Link: <https://augmentedrealmusicplayer.netlify.app/>

Created a Augmented Reality Music Player that can be used to play selected music with movement of markers using A frame, Howler.js, Ar.js.

- This music player can be used to play a combination of many music instruments or songs at once by selecting the correct marker

DISNEY MOVIE

Project Link: <https://disneyhotstarclone.netlify.app/>

- Developed an application which is very similar to the hotstar and here I have added some effects, working sliders and animations.
- In this web application users can check the overview of the movies and along with that they can also see the Carousel of the movies.
- This website had built using HTML, CSS, JavaScript
- Netlify has been used for hosting the website
